INNOVATIVE FIRE PRODUCTS

TRITON® M

Portable Water Purification System

SAFE WATER, ANYTIME...ANYWHERE™

Vital product for emergency preparation when water available to EMS workers, Firefighters and the general public is suspect or unsafe to drink due to tornadoes, hurricanes, floods, terrorist attacks or pandemic outbreaks

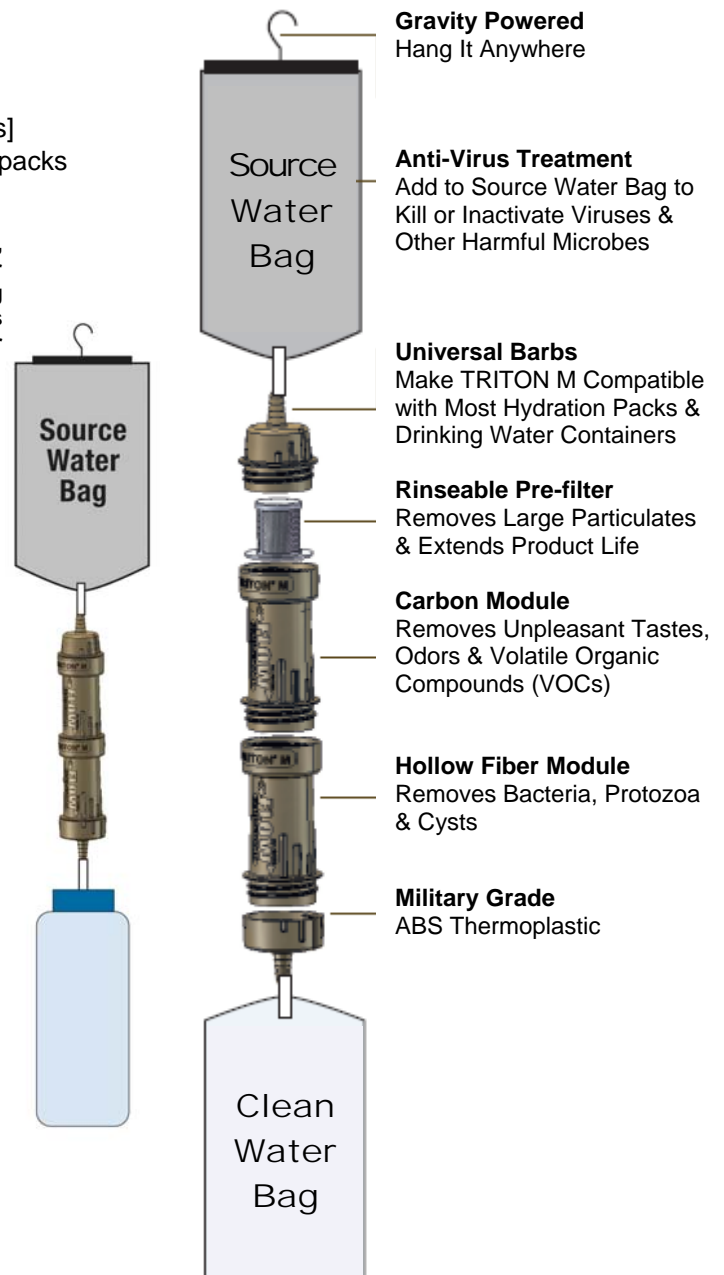

- Certified to NSF Protocol P248: Emergency Military Operations Microbiological Water
- Full protection against harmful microbes, including viruses, bacteria and cysts
- Meets US Army and EPA requirements for portable Microbiological Water Purifiers
- High flow rate – up to 0.5 L per minute
- Compact, lightweight, rugged military-spec materials
- No batteries, power, priming or pumping required
- High output: up to 130 gallons [500 liters] per filter
- Filters highly cloudy water [as opposed to UV systems]
- Customizable to fit different containers and hydration packs

Fill jerry cans, water bottles or other drinking water containers with purified water

TRITON M2MP can also be used in-line with any hydration pack reservoir for hands-free, mobile purification.

Hydration Packs will be available soon through Hansen Enterprises

Available **Exclusively** through Hansen Enterprises
